

Delivering outcomes for a healthier environment

Geeveston Outfall Relocation Project

TasWater is building a new outfall pipeline off Shipwrights Point as part of our commitment to improve environmental outcomes for the region.

We are relocating the Geeveston Sewage Treatment Plant outfall from the Kermadie River to deeper waters in the Huon River. The new outfall location will improve dilution and dispersion, delivering better environmental outcomes.

What's happening

From early November 2025 to January 2026 we are constructing a new outfall pipeline.

A Horizontal Directional Drill rig will be used to install the new pipeline 260 metres offshore, south of Shipwrights Point, at a depth of around 13 metres on the riverbed.

Where we'll be working

The work site will be located on an existing flat area bordered by large rocks, between the public toilets and the Yacht Club slipway. This work site was chosen to avoid the main public areas of the Regatta Ground.

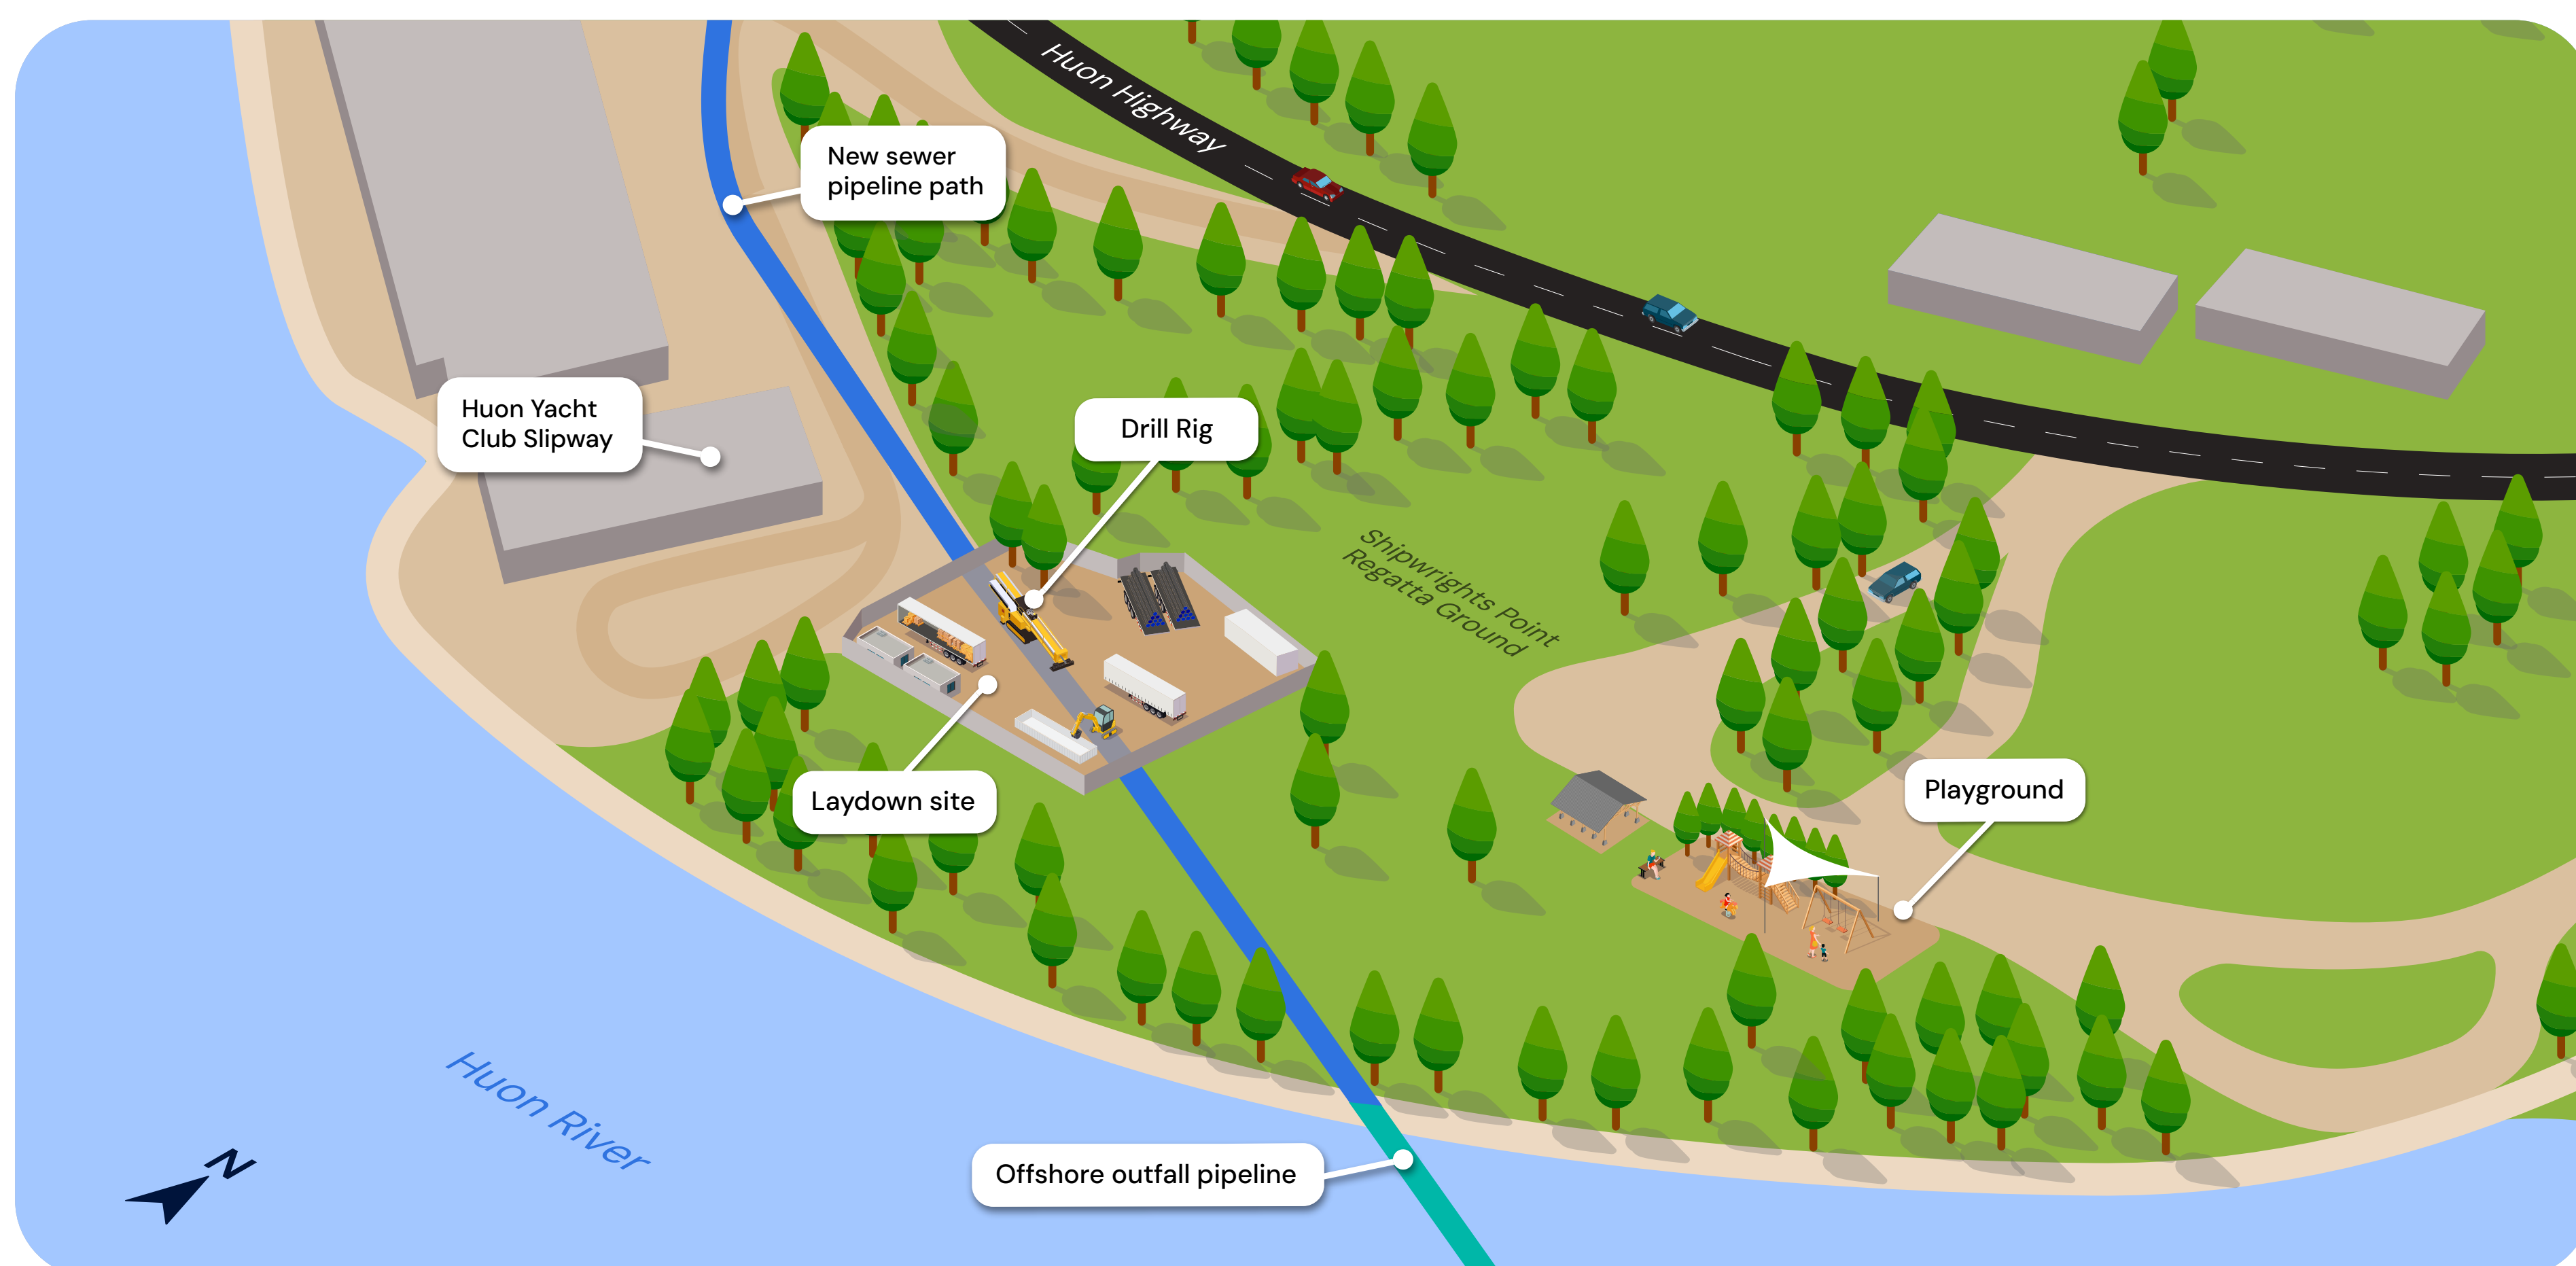

The fenced work area will include:

- A drilling rig and small site offices
- Construction vehicles accessing the site via the road past the Huon Aquaculture facility

Mitigation Measures

We know construction work can cause some short-term disruption, and we're doing what we can to keep this to a minimum.

We have installed some noise curtains around the site. During construction we will continually monitor the noise levels to make sure we meet required limits.

Monday–Friday: 7am–6pm

Saturday–Sunday: 8am–6pm

No work: 22 Dec 2025–5 Jan 2026

Water. It's Tasmania's thing.

Since creation, the Palawa have lived in Lutruwita – Tasmania. More than 2,000 generations of Aboriginal families have cared for this Country, looking after its lands, seas, skies and waterways. In the spirit of respect and gratitude, TasWater acknowledges the Tasmanian Aboriginal community as the traditional and ongoing custodians. We pay our respects to them, their culture and to elders past and present. TasWater commits to working collaboratively and respectfully with the Tasmanian Aboriginal community to protect and sustain the precious resources on this ancient land for future generations.
